## WORLD SKILLS STANDARDS SPECIFICATIONS CONSULTATION WITH INDUSTRY – 2018

Dear Mr. Komlev,

WorldSkills establishes and tests best practice in technical and vocational performance across 79 Member countries, regions, and economies. It does this through a two-year cycle of development which culminates in the prestigious WorldSkills Competition.

WorldSkills wishes to ensure that its standards fully reflect the dynamism of internationally recognized best practice in industry and business. To assist WorldSkills, recently you kindly reviewed the Description of Role and WorldSkills Standards Specification for IT Software Solutions for Business for WorldSkills Kazan 2019 in August next year.

We are most grateful for your valuable feedback by completing the questionnaire. Your feedback was considered along with that of others as part of the updating process of these two important pieces. In addition, your company name was added to the Technical Description for this skill to acknowledge your contribution in ensuring WorldSkills is truly reflecting global industry.

I wish to thank you for your support and look forward to your assistance in the future.

Kind Regards

*Jane Stokie*  
*Director of Skills Competitions*
